

Polymer water meter

(Product code: 102-00007, 102-00009)

Maximum Ag Polymer water meters

Polymer is used only with POTABLE COLD WATER up to 120oF (50oC) and working pressures up to 150 psi. The meter will register between 98.5% and 101.5% at normal and high flows and between 97% and 101% at the AWWA specified low flow. Accuracy tests are made before shipment, so no adjustments need to be made before installation.

Can be installed, horizontally or vertically.

5/8" x 3/4" fitting.

Available in liter and gallon.

1 year warranty.

1 pulse per liter or gallon

Working pressures up to 150 psi

Can be installed vertically or horizontally
