

Single Sided Ceiling Inlets (1300 and 2000 CFM)

(Product code: 300-00012, 300-00013)

AIR INLETS

Maximum Ag Single Sided Ceiling Inlets (1300 and 2000 CFM)

The Maximum Ag single sided ceiling inlets are equipped with auto centering pulley system. No more pinched cables, and relieves strain on actuators.

Constructed of high density PE, wash down is not a problem.

Get the air to flow where needed, during minimum ventilation, with side wings to direct air flow when open less than 50%. Maximum efficiency during minimum ventilation with curved doors, keeps air mixing at the ceiling.

High insulation factor to prevent condensation and dripping during cold weather.

Weather stripping around doors keeps leakage to a minimum when closed.

4000cfm rough opening, 46" x 20"

2600cfm rough opening, 29.5" x 20"

1 year warranty.

High density PE material

Curved doors for maximum efficiency during minimum ventilation

Aluminium main support for added strength

Comes included with attic insulation stopper

Technical Informations

4000cfm rough opening, 46" x 20"

2600cfm rough opening, 29.5" x 20"

1 7/8" pulleys, keeps cables from wearing.
