

AMMONIA SENSOR DOL 53

Product code: 105-00023

The DOL 53 Ammonia Sensor is designed for continuous measurement of ammonia (NH₃) concentration in livestock buildings. It provides accurate measurements of ammonia at low and high concentrations, without requiring any calibration.

The DOL 53 Sensor can be installed inside the farm without any need for tubes nor pumps.

- ✓ Continuous measuring to counteract the negative effects of high NH₃ concentration and take corrective actions when ammonia levels increase.
- ✓ The DOL 53 sensor measures ammonia concentrations from 1.5 to 100ppm, with an output range of 0 to 10V.

- ✓ Very accurate NH₃ measurements
- ✓ Resistant material for product durability
- ✓ 24V DC power supply, 10mA
- ✓ Easy to set up, no calibration needed
- ✓ 1-year warranty
- ✓ IP65
