

# CO2 SENSOR

Product code: 105-00009

- ✓ Air quality is an important parameter to ensure optimal production conditions in farm buildings.
- ✓ The amount of CO2 in the air is normally used as an indicator of air quality.
- ✓ Most manuals and textbooks recommend a maximum level of about 3000-3500 ppm.
- ✓ Carbon dioxide is a key indicator of the indoor air quality.
- ✓ You can now manage the supplied amount of fresh outdoor air with the Zaxe CO2 Sensor.
- ✓ Advanced temperature controllers can control minimum ventilation based on current CO2 level measurements.

- ✓ Measuring principle by non-dispersive infrared technology (NDIT)
- ✓ High precision
- ✓ Easy to set up
- ✓ Ensures optimal production conditions
- ✓ 1 year warranty
