

LED FEED SENSOR DOL 28R

Product code: 105-00025

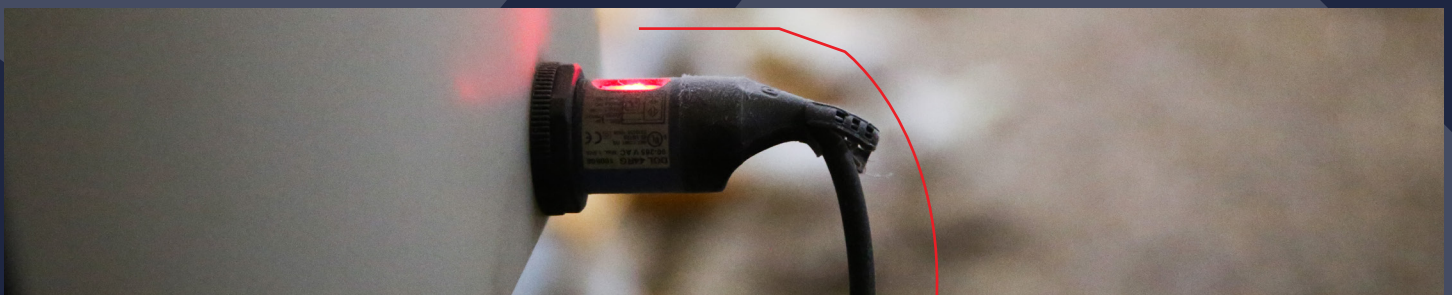

The DOL 28R is a 30 mm capacity relay feed sensor with an integrated LED indicator.

It is intended for feed pans in poultry production.

Compared to conventional lighting solutions, the DOL 28R Sensor is discreet, intuitive, and very easy to install. It can also be used to upgrade existing feed systems in livestock buildings.

- ✓ Robust and easy to operate.
- ✓ The light's purpose is to get the birds' attention, ensuring stable feeding.
- ✓ Features a built-in powerful relay with switch function.
- ✓ Plastic enclosure for electronic protection against humidity and other external influences.
- ✓ High immunity to noise from electric communication and transients.

- ✓ LED pan lighting
